NEWS RELEASE

KEX2007-15

Flagstaff, WA Reclamation Bond Posted

Kent Exploration Inc (“the Company”) reports that it has posted a reclamation bond with the Spokane, WA office of the United States Bureau of Land Management for a planned diamond drill program, bulk sample and geophysical survey of the Company’s 100% optioned Flagstaff property.

The Flagstaff property at Northport, WA, approximately 15 km south of Rossland BC, is highly prospective for gold/silver and lead/zinc mineralization and contains a historic barite resource.

The drill program will consist of up to 5,000 feet of diamond drilling to follow up a number of high grade gold intersections reported by CE Minerals in 1981 during their 19,260 foot drill program defining the historic barite deposit on the property. The Company has commenced a program to flag the prior drill hole locations.

Historic reports on the Flagstaff property can be viewed on the Company’s website at <http://www.kent-exploration.com/flagstaff.html>

Kent Exploration Inc is a junior exploration company that has earned a 50% interest in the Ivanhoe Creek property, a Midas-style target in Nevada’s Carlin Trend, has a 100% interest in a mining lease option on a gold/silver/barite prospect in eastern Washington state, and is earning a 100% interest in the Rosebud property, a gold/silver prospect in northern Arizona.

This News Release has been prepared on behalf of the Kent Exploration Inc Board of Directors, which accepts full responsibility for its contents.

ON BEHALF OF THE BOARD
