KEX2007-26

ROSEBUD DIAMOND DRILL PROGRAM RECOMMENCES

Kent Exploration Inc ("the Company") reports the 5,000 foot diamond drill program has recommenced on its 100% optioned Rosebud property, which is highly prospective for gold and silver, and which lies approximately 36 miles NNE from Kingman, Arizona.

This segment of the drill program is targeting two mineralized zones on the west side of the 800 acre property. Three holes are planned in each of the targeted areas of the zones. The first three holes are in the south-east end of the "B" zone and the second three holes are in the north-west end of the "A", or most westerly zone. The "B" zone is approximately 25 feet wide in the vicinity of the drill area and has a dip of -71° to the north-east while the "A" zone is approximately 5 feet wide and dips -75 to the north-east. Both zones have a known strike of approximately 1 mile from the northwest to the south-east.

The first segment of the drill program, which was completed 14 October 2007, consisted of three diamond drill holes targeted under the south-east end of the historic workings on the Southwick zone. Assays are pending.

Kent Exploration Inc is a junior exploration company that has a 100% interest in a mining lease option on a gold/silver/barite prospect in eastern Washington state, is earning a 100% interest in the Rosebud property, a gold/silver prospect in northern Arizona and has earned a 50% interest in the Ivanhoe Creek property, a Midas-style target in Nevada's Carlin Trend.
