NEWS RELEASE

KEX2008-26

**KENT EXPLORATION ACQUIRES SILVER/LEAD/ZINC PROPERTY**

Kent Exploration Inc (the "Company") reports it has staked seven claims totaling approximately 1,300 ha, in north-east Saskatchewan.

The claims, which the Company considers to be highly prospective for silver/lead/zinc, are immediately to the east of Courtney Lake and abut, and are on strike with, the Wakefield Lake zinc prospect held by Golden Arch Resources.

The Wakefield property reportedly straddles a steeply dipping quartzite bed that hosts a zinc deposit. Surface drilling by Falconbridge in the 1950's indicated a deposit of approximately 5 million tons reportedly grading 2.65% zinc and 0.35% lead, which included a higher grade core of 2.9 million tons averaging 3.67% zinc and 0.53% lead\*.

*\*The above data, while believed to be accurate, has been derived from a report on the George Lake Zinc Deposit by S. Karup-Moeller and J. J. Brummer, Economic Geology, Vol 65, 1970 PP 862-874. The data has not been independently verified by the Company and as such should not be relied upon.*

\*\*\*\*\*

Kent Exploration Inc is a junior exploration company that has a 100% interest in a mining lease option on the Flagstaff Mountain property, a gold/silver/zinc/barite prospect in eastern Washington state, is earning a 100% interest in the Rosebud property, a gold/silver prospect in northern Arizona, has earned 50% of a 100% interest in the mining lease option on the Ivanhoe Creek property, a Midas-style gold/silver target and 50% of a 100% interest in the Ivanhoe Creek placer claims, covering a bentonite deposit in Nevada's Carlin Trend, and has a 100% option on the Silver Hills property, a silver/ lead/ zinc prospect in south-eastern British Columbia.
